

PROTEIOS

Textured Vegetable Proteins

PROTEIOS is a new range of Textured Vegetable Proteins (TVP) made by advanced extrusion technology, to create different shapes and structures including a high protein content. TVP can be used in the preparation of meat or fish analogue products and for unconventional protein enrichment.

PRODUCT CHARACTERISTICS

- Soy-free and gluten-free
- No additives
- Meat-like mouthfeel texture
- Neutral to minimal taste
- Versatile and easy to flavor and color

OTHER FEATURES

- Light yellow color
- Available in different shapes and sizes
- Made in Europe
- Customizable
- Totally formulated and developed in Italy

DOSAGE & EXAMPLES

- According to GMP and final application
